EDUCATION

Queens College

Bachelor of Arts in Computer Science

Queens, NY

Aug. 2022 – May 2026

Queens Technical High School

CTE Endorsed: Cisco Networking & Cloud Computing

Long Island City, NY

Sep. 2018 – June 2022

EXPERIENCE

Sales Associate

Famous Footwear

March 2024 – September 2024

Queens, NY

- Delivered exceptional customer service by assisting with product selection, answering inquiries, and resolving issues to enhance the shopping experience
- Operated cash register and processed transactions efficiently, including handling cash, credit/debit payments, and returns
- Assisted with inventory management, including stocking shelves, organizing merchandise, and conducting stock checks
- Collaborated with team members to meet sales goals and promote store promotions and loyalty programs

PROJECTS

Hack Knight Hackathon | UI/UX Designer & Front-End Developer

- Designed the UI/UX for InternPing, an interactive internship discovery platform that allows users to “Ping” or decline opportunities based on their interests and skills.
- Created wireframes, prototypes, branding assets, and interface designs using Figma and Canva to develop an intuitive and engaging user experience.
- Collaborated with team members to translate designs into a functional web application using HTML, CSS, and JavaScript.
- Applied iterative debugging and rapid learning to implement JavaScript functionality during a time-constrained hackathon environment.

Personal Portfolio Website | *HTML, CSS, JavaScript*

- Designed and developed a responsive personal portfolio website to showcase software projects, technical skills, education, and professional experience
- Implemented interactive components and responsive layouts using HTML, CSS, and JavaScript to provide a user-friendly experience across desktop and mobile devices
- Integrated links to GitHub, LinkedIn, and project repositories to provide direct access to technical work and professional information

QuizApp | *HTML, CSS, JavaScript, Node.js, Express, MongoDB*

- Collaborated with a team to develop a full-stack trivia application featuring user authentication, timed quizzes, score tracking, personal quiz history, and a leaderboard
- Designed and implemented the frontend interface using HTML and CSS, creating responsive layouts for the home, quiz, results, sign-in, leaderboard, and profile pages
- Worked closely with teammates responsible for JavaScript logic and the Node.js/Express/MongoDB backend to integrate frontend components with application functionality
